NIU Coffee House

This is a graduate project done by csci566 graduate students from Section:2

Instructor: Georgia Brown

Team members:

Chaithanya Krishna .G   Z1815642

Rajarshi Sen   Z1816768

Sumanth Datta .N   Z1811126

Project Link:

http://students.cs.niu.edu/~z1815642/project/

The description of the pages and their functionality is as follows.

Index page:

This is the first page of the project which will be displayed when the user enters the link to this site.

It asks the user to enter the user_id and password.It will validate whether the details entered by the

Users are correct or not.It also contains a sign up link through which the user can register.

Sign_up page:

This page helps the new users to register with the system. This asks the user for the email id and allows

The user to enter their username and password. Performs some validations. Once the user successfully

Creates his account. This will redirect to index page assisting the user to login.

Welcome page:

This page appears when the user successfully logs into the system. At the top right corner, a welcome

 Message for the user with his/her name is displayed. It mainly displays the details about the system

Functionality.

Register page:

This page allows the user to register for Performance by giving details like group name, genre type.

It also asks the user to enter the number of people going to perform on the set. It ask user to select the

Desired date to perform. It performs some validations based on the data entered by the user. After

Entering the correct information. Based on the number of people, system will ask the user to enter the

member names and also asks for some details like mobile number, email id.Now the system will check

The slots that are available on the selected date and display it to user. If the user is convenient with the

Displayed slots, he can select one. If not he can redirect back with the help of cancel button. If the user

Selects a slot and click on submit. A new group id is created and it will be displayed to user as registration

id.This helps to get the performance details.

View Performance details:

This page helps the user to get the performance details based on the registration id entered. The

Registration id is the one which the user gets after booking a slot for performance(in Register page).

The user enters the registration ID in the text box provided and when he click get details button. A table

Will be displayed with the details of the performance. If there are no details found on the id entered, an

Appropriate message will be displayed.

List all Performances

This page helps the user to view all the performances that are scheduled in the coffee house .If there are

No performances registered yet, appropriate message will be displayed.

Exit:

When the user clicks on this he will be logged out of the system. He will be displayed a link to log in back

Into system. This will navigate to index page which we discussed earlier.

Conclusion: We have opened the slots of only may 2017.So the system will only let you access the may

2017 slots.These are the functionalities of our system

Thank You
